

Empowering Sustainable Growth Through ESG Excellence

We are proud to share that an insightful **ESG (Environmental, Social & Governance) Training Program** was successfully conducted for the **HCI Suppliers Club (West Zone)** in **Pune** on **27th June**, in collaboration with **Motherson Sumi**.

With participation from **18 leaders representing 12 top-tier supplier organizations**, this session served as a dynamic platform to exchange ideas, share best practices, and explore global trends in the ESG landscape. The program aimed to deepen the understanding of sustainability imperatives and drive meaningful action across the automotive value chain.

This initiative marks a significant step toward fostering **collective learning and responsible business practices** that benefit both industry and society. We are excited to continue supporting such engagements that promote awareness, capability building, and strategic alignment with ESG principles.

 Together, we're not just preparing for the future — **we're shaping it.**
